CE Jacobson

Jason Mielke | CE Jacobson Principal

Priority Area 1: Achieve Academic Excellence

- Four teaching staff members in grades 3,4,5 recently attended a guided math instructional workshop. These four teachers will be piloting this program one day per week next year and working to establish curriculum for cooperative learning stations.
- I have attended multiple evening events that our talented students have been participating in:
 - Second grade concert
 - 5th/6th grade choir concert
 - 5th grade Play

Priority Area 2: Foster a Positive and Safe Environment

- PBIS committee continues to work on positive reinforcement ideas that we can bring into our building next year. We have gathered many positive behavior interventions, and found a free universal screening tool we can use with students to be more proactive in anticipating potential behavior distractions.

- TSA school link mental health service will be increasing their minutes in our building. Currently one day per week will increase to 3 days a week in January. This service is a grant funded program from TSA and has been very successful in meeting the needs of our student population.

Priority Area 3: Financial Stability to Support the District Mission

Priority Area 4: Strengthen Community Relationships

- Many teachers have started finalizing their new Google teacher websites and you will start seeing these on are webpage to increase teacher to parent communication. The end goal is to have all components fully operational by fall of 2016.
- Recently we sent home a technology survey to see how many homes we are able to communicate with electronically. Look for results of this survey at the January board meeting.
